Forensic Pathology (Mortuary) Whanau/Family Room

LabPLUS ...

... provides Mortuary facilities for the Auckland region.

Forensic Pathology (also known as the Mortuary) is situated on the ground floor of the LabPLUS building next to Auckland City Hospital.

This is the first building (Building 31) on the right hand-side after entering gate 4 from Grafton Road.

After a person has died, a post-mortem is sometimes required by the coroner and this procedure is carried out in Forensic Pathology by a Pathologist. This cannot always be performed immediately and for some families, it is important for them to be with their dearly departed.

Facilities are available to families within the mortuary service so they can wait for the release of their loved one. *Please Note: This is not designed as a sleeping facility.*

The Whanau/Family room provides a healing environment and is accessible anytime day or night by prior arrangement only. Please wait for whoever organised your visit to gain access.

There is parking for a very limited number of cars on the courtyard directly outside the Whanau / Family Room. To assist Funeral Directors access you may be asked to move your car temporarily.

Please note additional parking is available in the Wilson Carpark B, close to the LabPlus building. (Parking here may incur costs).
